March 2021 - April 2022

### React js Developer

#### Upwork

Upwork, formerly Elance-oDesk, is an American freelancing platform. In 2015, the Elance-oDesk merger was rebranded as Upwork and the company's full name is now Upwork Global Inc. Upwork is currently based in Santa Clara and San Francisco, California.

Wrote clean, clear and well-tested code for various projects.

Collaborated with other developers to identify and alleviate the number of bugs in the software.

Worked closely with other developers, UX designers, Backend engineers and data analysts to create cohesive finished products.

Enhanced coding of CSS and JavaScript, improving user experience scores.

Develop highly interactive web applications utilizing JavaScript, HTML5, CSS, JSON, ReactJS, and integrating Restful API's, external web services ensuring high performance on Mobile and Desktop.

Web application development experience using ReactJS.

Use of Git and GitHub repositories.

Write Cascading Style Sheet and implement it in the views/layouts as needed.

Create partials for blocks of HTML code that can be reused.

Developed with React component-driven development.

Improved JavaScript and CSS quality by conducting code analysis and recommending changes in policies and procedures.

Used React, Styled Components and other technologies.

Used React concepts like JSX (JavaScript Syntax Extension), components, state, and props.

Extensively used CSS preprocessors like LESS for reusable style components.

Created routes.
